Currently the EU is negotiating about new data privacy laws. This new EU Regulation will replace all existing national laws on data privacy. Here you can see a general overview which Members of the European Parliament (MEPs) are pushing for more or less data privacy. Choose a country, a political group or a MEP from the "Top 10" list to find out more.

Europarl Hackathon for the European Elections 2014

Telling the story of the European Parliament - More facts, less fiction

It's likely that fewer than ever will go vote in 2014. One of the reasons is that we don't know what the European Parliament has achieved since the last election in 2009. We need to make its work and main achievements more visible to the voters and push people to better understand and look at the facts when casting their vote.

People might vote based on emotion, but the choice should be based on information. If you think politics is nurtured on facts; if you think that your fellow citizen will become more involved in the elections if they get the chance to learn what the Parliament has actually achieved or how it has failed we are on the same page. Democracy needs informed citizens and politics would be better with more people watching and participating outside on the inner circle. The participants of the Hackathon 2014 are at fixing just that and we want to make the Parliament more interesting and appealing - based on facts.

We know that data by itself is not interesting enough (at least not for the vast majority) - so we need **activists and journalists** to know what data to look for, **statisticians and developers** to extract the relevant information, and datavisualisation and user interface artists to make the facts clear and readable. And all of the above to create the resources that we will select to build

IGNORANCE IS STRENGTH

- 10) scientific and technological cooperation and agreements: 19

EU Integrity Watch is a user-friendly interactive database that provides a unique overview of the activities of members of the European Parliament. By simply clicking on the graphs or the list below users can rank, sort and filter MEPs. Thereby the database allows to better monitor potential conflicts of interests or to identify those MEPs with more outside activities with the help of the External Activity Indicator (EAI)
